My craftsman ez walk 917.377700 had carburetor issues, so I replaced it. I've know nothing, and the part came from sears without any information; when I replaced it and started it, it raced too fast, and I might have put the wire things from the throttle on wrong, but I can't find a diagram that shows how it should look. I switched the wires, but it still raced, and now it won't run at all.
