Carburetor rebuild kits, or carb kits as we call them, are used when cleaning up an older fuel system on an OMC sterndrive. Kits are available for 2BBL and 4BBL carbs in either Rochester or Holley brands. Compared to completely replacing your carburetor with a new or rebuilt unit, a carb kit is the economical alternative to get your OMC tuned up and reliable.

OMC Sterndrive Carburetor Kits - Marine Engine

The Chevrolet "Big Block" is a term for a series of large displacement V8 engines that have been developed and produced in the United States from the 1950s to the current day. As American automobiles grew in size and weight following the Second World War, the engines powering them had to keep pace. Chevrolet had introduced its popular small block V8 in 1955, but needed something larger to power ...

Marine Engines 4 Less

Of all the questions we are asked, one of the most frequent is which gas engine is best. I have some very definite opinions about that because I perform a lot of gas engine surveys, as well as engine failure analysis for insurance companies, meaning that my perspective is not based on the

Marine Engines : Gas Engines - by David Pascoe, Marine ...

Big Block Chevy Cylinder Heads Open vs. Closed Chamber - A good way to describe big-block heads is to categorize them as open or closed chamber. Closed-chamber cylinder heads have small combustion chamber volumes for high compression ratios, with even mildly domed pistons.

Big Block Chevy Engine Parts casting numbers and ...

American Motors Corporation (AMC) designed and manufactured three distinct V8 engine designs. Their first V8 engine design was made from 1956 through 1967. Their second design debuted in 1966 and was made through 1991, although modified to become a 3rd generation, with a taller deck in 1970.

AMC V8 engine - Wikipedia

When I started this Web site back in 1996 there wasn't much information about big block Chevy engines on the Web, so I decided to create this page. I don't claim to be an expert about engines and am simply sharing some of the information that I've compiled from many different sources. Eventually I'd like to be able to provide some good technical information, especially about cylinder heads ...

Big block Chevy engines - roadsters

Gen I small-block Chevy engine. This drawing is of the 1967 version of the 302 cid Chevrolet. Drawings by David Kimble. Production of the original small-block began in the fall of 1954, for the 1955 model year, with a displacement of 265 cid, growing incrementally over time until reaching 400 cid in 1970.

Reference: Chevy Engine Block Casting Numbers

That would be my guess. Some of the better economy estimates above are hard to believe, considering that in a properly tuned modern gas engine, it takes at least 19 gph to put out 200 hp, and I doubt that boat could do much better than about 24 knots with less than 400 total hp.
