I just picked up a project 2000 Seadoo Challenger 15' with the twin 717cc engines. Previous owner had battery die on last trip out last year. He stored it in the garage for the winter. Took it in to have it dewinterized and the guy said that both engines had water in them and were locked up. I checked it out and one engine turns, but the other is locked.

Another plus to the Challenger 2000 is a choice of Mercury engines, either a 200- or 240-hp powerplant. These engines were developed by Mercury especially for Sea-Doo, says the company, and both have over-rev protection, along with low oil and engine overheat warnings. The mixed-flow, high-volume jet pump gives the boat excellent acceleration.

The Sea-Doo 787 engine is a small and relatively lightweight engine that has been used in some of the Sea-Doo company's most popular models, such as the Sea-Doo XP from the mid 1990s. A quality machine like a Sea-Doo can run for decades, but sometimes its parts, especially the hardworking motor, need a little TLC.
