I have 1988 baretta that i bought with a 350 engine and a volvo penta outdrive. This is my first boat actually. I was told when i bought the boat that the gimbal bearings will need to be replaced cause they are making a noise, and the bellows were bad on the outdrive, and that the carb will need to be worked on cause the engine would idle fine, but would die out at about 2,000 rpm or so.
