Hello, I need some guidance with my 2002 Audi A4. I swapped out the Stock symphony II radio with a symphony II+ and a proper wiring harness to convert the wiring. Everything works like it is suppose to with the exception that radio does not turn off when you shut off the car even after an hour passes. What should I do to try and fix this issue?

This post is created to help you to identify your Audi Entertainment System or as we call here Head Unit. Every unit has a description of their functionality and what type of devices can be retrofitted to it.

### **Audi Entertainment System (Head Unit) Guide**

I completed the aux input install detailed in DIY: Aux Input for Symphony II+ on my Concert II+, but with a slight modification. Instead of mounting the socket in the dash I chose to route it to the arm rest. My reasoning was that I don't like a cluttered dash (cup holders, phone holders etc...) so this way my media player can be hidden away.
