EVAP Canister Purge Regulator Valve. EVAP System: The primary function of the EVAP system is to trap fuel vapor created by the fuel in the fuel tank.

Audi EVAP Purge Solenoid P0441 - Incorrect Purge Flow

It could be the quality of the gas you put in the tank. Audi's prefer high grade fuel. If you put cheap and/ or low grade fuel, you may cause engine or fuel injection issues. Another option is there could be moisture in your fuel tank. Cheap gas can have higher levels of moisture. Auto part stores ...

Audi A4 Questions - Starting problems - CarGurus

sounds to me like you have a bad relay or fuse. and the ac issue may relate to heating issues. if your heater does not blow hot air threw the system at idle speed just have your coolant bled out from the purge valve. this is usually the cause for the ac not blowing cold as well. if you had any recent timing belt or radiator work done or had or have a leak in rad fluid then you will have to ...

Audi A4 Questions - air conditioning is charged, but won;t ...

All modern cars use the vacuum created by the induction system and the motor to run various systems and components on the vehicle. The Audi A4 is not different in this regard and uses vacuum to assist in the EGR (exhaust gas recirculation) system as well as the intake system.

Audi A4 B6 Fixing Common Vacuum Leaks (2002-2008 ...

You don't need to remove the compressor outlet hose at this point, but you can see here that I have. Note the oily discharge that has been building up for some time; this can be a symptom of a problem with the turbo, but in this case it appears to be simply the accumulation of oil through the crankcase ventilation system (which is directed into the intake tract just ahead of the turbocharger ...

There are probably more, but I know of a couple of causes. You could have an air leak in the fuel system, probably at the o ring on the fuel filter, leaking and letting in air.

Air bubbles in fuel line coming from fuel filter ...

The dealer needs to properly bleed the air out of the system, especially since they replaced the power steering cooler. And the power steering rack wouldn't exhibit a "grumbling whine" - that sound is probably coming from the power steering pump, which will make that sound when it is trying to pump air vs. fluid.
