Note: 2008 and older issues are only available as .chm files. On most versions of windows you must first save these files to your local machine, and then unblock the file in order to read it. To unblock a file, right click on it, and select properties, and then select the 'unblock' button.

MSDN Magazine Issues

The most widely recognised problem with fixed geometry devices is turbocharger lag; the poor transient response of the turbocharger at low engine loads. Fig. 1 shows the major contributors to turbocharger lag for a SI engine. The biggest contributor is the rotating inertia of the turbine; this is due to the airflow not being sufficient to spool up the turbine rotor to higher speeds, a problem ...
