Interstellar travel is the term used for crewed or uncrewed travel between stars or planetary systems. Interstellar travel will be much more difficult than interplanetary spaceflight; the distances between the planets in the Solar System are less than 30 astronomical units (AU)—whereas the distances between stars are typically hundreds of thousands of AU, and usually expressed in light-years.

This is a Buick Le Sabre with one more headliner attitude. This one did not even have the cloth

bottom in the car...it was removed by the owner so he could see out of the rear view mirror, but in a short amount of time and a headliner kit, we made the interior much more pleasant to be in (and a lot less dusty).

### **What is the approximate cost to have a headliner replaced ...**

Of those American vessels near the Argonne when first contact was made with the enemy, only the Washington was sufficiently massive to go out in a blast of yonder size and shape. If that was the case Captain Martin Diaz of the United States Astromilitary Corps was a dead man. The other ships of the line were too distant, traveling on vectors too unlike his own, for their scout boats to come ...
