I've been having troubles with my 2000 volkswagen jetta VR6. The check engine light came on and i had AutoZone scan it. They said it was a speed sensor with no power. I was told to have someone with a VAGCOM device scan it, which i did last night. They said it was a G68 sensor, could be unplugged or may need to be replaced. We drove VERY rough roads this weekend, its VERY possible it just ...

The engine speed sensor, crank sensor, is on the forward side of the engine, near the flywheel, but sticking into the crankcase. You loosen the electrical connector, loosen the bolt (the bolt head is external triplesquare, I think. But I also think a regular 12 point socket would take it loose.) Then you pull the sensor.
