When it came to choosing a big block engine in the Chevelle, the 396 was still the only engine of choice. Be it good or bad, 1967 saw some revisions made to the 396ci engine lineup. The base 396ci engine (RPO L35), still boasted 325 horsepower, and still used a cast-iron intake manifold with a single Quadrajet carburetor.

While similar to the previous version, the 1967 El Camino featured a new grille, hood and front bumper. New fenders and headlamp bezels were also revised on the 1967 El Camino. A dual master cylinder and front power disc brakes were now optional. Although the 396 engine was available, there was no official 1967 El Camino Super Sport option.

### 1967 El Camino Parts and Restoration Information - SS396

The SS 396 saw a performance damper. The L78 was not available, and the L34 dropped to 350hp from 360hp. This was a result of a new GM rule governing the horsepower allowances for all cars other than the Corvette. Although GM did not offer the L78, some dealers installed the engine and 612 cars included this high performance engine.

### 1967 Chevrolet Chevelle | My Classic Garage

1967 Chevrolet Chevelle Sporting minor trim changes the Chevelle exterior remained much the same for 1967 with the exception of a new reworked bumper and a new blackout tail panel. Among other changes included better drivability with more aggressive tires, front disk brakes, and 14" wheels.
