The 1985 Corvette represented the second year of the fourth generation of Corvettes. In 1985, a better fuel injection system was introduced to the Corvette. It was called Tuned Port Injection, which replaced Cross Fire Injection. The new 350 cubic-inch engine had a new designation called the L98. This new engine would ...

Corvette L98 Engine Specs | It Still Runs

The Chevrolet small-block engine is a series of V8 automobile engines used in normal production by the Chevrolet Division of General Motors between 1955 and 2003, using the same basic engine block. Referred to as a "small block" for its comparative size relative to the physically much larger Chevrolet big-block engines, the family spanned from 262 cu in (4.3 L) to 400 cu in (6.6 L) in displacement.

Injectors You will need to know what size injectors come w/ the TPI, or at least know the engine size they were on.. 19lb/hr injectors were used on 305s, 22lb/hr injectors were used on 350s. All the Y-body units should come w/ 22lb/hr injectors, since the Vette didn't come w/ 305s, and all '85 and '86 F-body units should come w/ 19s since the 350 wasn't used on these cars until '87 unless it ...

The compression ratio is a single number that can be used to predict the performance of any internal-combustion engine. It is a ratio between the volume of a combustion chamber and cylinder, when the piston is at the bottom of its stroke and the volume when the piston is at the top of its

stroke.
