A few months ago, my wife and I started to notice that our minivan transmission was acting a little funny. When slowing down to a stop, the transmission would drop from second to first (we have the 4-speed automatic) with a clunk, sometimes so forcefully that the car would shudder as a result. Additionally, I noticed that the cruise control had gone all wonky -- I'd set the cruise, but the ...

First, it is the lifeblood that enables a transmission to transfer power from the engine to the pavement. The torque converter uses ATF to form a hydraulic circuit in order to transfer rotational force from the engine to the transmission.. Its second purpose is to cool the transmission by absorbing the heat created by all its moving parts and expelling the heat through the radiator.
