I have a 2001 BMW x5 4.4i V8 with a bad engine (timing chain snapped). I was wondering, will an engine from a 2001 bmw 740il be interchangeable with the x5 engine. I was told the oil pan is different between the x5 and 740il and would have to change those out, but besides that, are there any other differences between the two engines (i.e. engine mounts, wiring harness, vanos, sensors, etc)?
