I have a Honda 13 hp model GXV390K1DET3 The motor has 6 wires coming off of it. Near the carburetor there is one black wire that I think goes to the on/off switch to shut the engine off. There are two green wires next to the starter. Then there are three wires coming off of the oil sensor two green and one red wire.

To hook up electric start I need a 4 post key switch with terminals B, S, M G. B= wire from switch to pos side of batt. S= off the ground side of the starter solenoid is a 16 ga wire that is labeled (to starter switch), I hook this to the S terminal on the switch. M=grounds out the magneto (I know this wire) G= ground wire for engine/deck.

This manual covers engine selection, engine installation design and engine installation testing, so the combination of a Honda engine and your equipment will make the best possible product. Please feel free to contact your Honda Engine Distributor at any time for additional technical information or to discuss your engine application needs.

### **Technical Manual - trictools.com**

Bought this for my GX390 13 hp Honda engine (pressure washer). After easy install started right up. Adjusted fuel/air mix. Reset idle. Now starts and runs like when new. Usually one pull does it. Highly recommend and would buy again. Would recommend checking spark and compression (90-100psi) to eliminate any other hard start/run issue.
