160cc 5.5 hp Honda Go Kart

The relationship between cubic centimeters (cc) and horsepower (hp) is complex and depends on many factors. First of all, it's important to note that cc is a measure of engine size, while hp is a measure of how much power it produces. Generally, a larger engine will produce more power, but the ratio isn't uniform across all engines.

How to Convert CC to HP for Small Engines | It Still Runs

Re: How to covert CC to horsepower The short answer is about 15 to 17cc = 1 hp or about 1 cu.in. = 1 bhp for a modern car. The full answer is complex - the power output of an engine depends on the state of tune as well as size, and the definition of horsepower must be considered, brake horsepower (bhp) or shaft horsepower (shp), and is not covered here.

How to covert CC to horsepower - OnlineConversion Forums

The B-series are a family of inline four-cylinder DOHC automotive engines introduced by Honda in 1988. Sold concurrently with the D-series which were primarily SOHC engines designed for more economical applications, the B-series were a performance option featuring dual overhead cams along with the first application of Honda's VTEC system (available in some models).

Honda B engine - Wikipedia

Changes in Small Engine Horsepower Ratings The manufacturers of small engines have adjusted the horsepower that they state their engines make. All of the major manufacturers have now adopted using at least the SAE J1940 Standard 2012 Revision, to rate the horsepower output of their engines. The SAE International J1940 Standard was revised

Honda HRS216VKA 21-Inch 160cc Self-Propelled Lawn Mower

CC is a measurement of volume or size where Engine horsepower is a measurement of power output at certain rpm. Engine horsepower cannot be directly converted to cc because horsepower is measured at rpm levels that cubic centimeters do not account for. So no specific formula for that but on average 1 horsepower equals 16 cc.

How much horsepower does a 200cc engine have? - Quora
