2003 Audi A4 Position Sensor

The cam position sensor is critical to the proper functioning of the engine management system in its timing of engine events. The sensor delivers information on the position of the camshaft that actuates the engine's intake valves to the computer, which uses that information to deliver fuel and spark at the correct time.

The Audi V8 (Typ 4C) is a four-door, full-size luxury sedan, built by Audi in Germany from 1988 to 1993, as the company's flagship model. It was the first car from Audi to use a V8 engine, and also the first Audi to combine a quattro system with an automatic transmission. Early cars used 3.6-litre V8s, while later cars featured a 4.2-litre version of the engine.

Audi V8 - Wikipedia

ABS Problems: Wheel Speed Sensor Problems: The ABS Wheel Speed Sensors located at each wheel hub consist of a permanent magnet wrapped with a coil of wire and are referred to as Inductive type sensors.
